Springer

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in form of an abstract or as part of a published lecture, review or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as - tacitly or explicitly - by the responsible authorities at the institution where the work was carried out. Transfer of copyright to Springer-Verlag becomes effective if and when the article is accepted for publication. The copyright covers the exclusive right (for U.S. government employees: to the extent transferable) to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or other reproductions of similar nature.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher. The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

An author may make an article published by Springer-Verlag available on his/her personal home page, provided the source of the published article is cited and Springer-Verlag is mentioned as the copyright holder. Authors are requested to create a link to the published article in LINK, Springer's internet service. The link must be accompanied by the following text: "The original publication is available on LINK at http://link.springer.de".

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the *Copyright Clearance Center*, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0001-5903, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The *Canada Institute for Scientific and Technical Information (CISTI)* provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, CISTI, Ottawa K1A OS2, Canada (Tel. +1-613-9939251; Fax +1-613-9528243; e-mail: cisti.docdel@nrc.ca).

Index Volume 36 1999/2000

Abolhassan F, Keller J, Paul WJ: On the cost–effectiveness of PRAMs 463

Back RJR, von Wright J: Reasoning algebraically about loops 295
Białasik M → Konikowska B 375
Bonner AJ, Mecca G: Querying sequence databases with transducers 511

Caleiro C → Ehrich H-D 591
Carpi A, de Luca A: Special factors, periodicity, and an application to Sturmian words 983
Černá I, Křetínský M, Kučera A: Comparing expressibility of normed BPA and normed BPP processes 233
Cheng TCE, Ding Q: Single machine scheduling with deadlines and increasing rates of processing times 673
Csuhaj-Varjú E, Mitrana V: Evolutionary systems: a language generating device inspired by evolving communities of cells 913

Degano P, Priami C, Leth L, Thomsen B: Causality for debugging mobile agents 335
de Luca A → Carpi A 983
Ding Q → Cheng TCE 673
Dolev S, Gouda MG, Schneider M: Memory requirements for silent stabilization 447

Ehrich H-D, Caleiro C: Specifying communication in distributed information systems 591

Fiat A, Woeginger GJ: On-line scheduling on a single machine: minimizing the total completion time 287
Flajolet P → Mahmoud H 735
Forst G, Thorup A: Minimal Huffman trees 721

Gorlatch S, Lengauer C: Abstraction and performance in the design of parallel programs: an overview of the SAT approach 761
Gouda MG → Dolev S 447

Han Y, Igarashi Y: Parallel PROFIT/COST algorithms through fast derandomization 215
Honkala J: On slender 0L languages over the binary alphabet 805

Igarashi Y → Han Y 215
Ilie L, Salomaa A: On the expressiveness of subset-sum representations 665
Intrigila B, Varricchio S: On the generalization of Higman and Kruskal's theorems to regular languages and rational trees 817

Jacquet P → Mahmoud H 735

Keller J → Abolhassan F 463
Kesten Y, Manna Z, Pnueli A: Verification of clocked and hybrid systems 837
Khardon R, Mannila H, Roth D: Reasoning with examples: propositional formulae and database dependencies 267
Kinoshita Y, Power J: Data refinement and algebraic structure 693
Konikowska B, Białasik M: Reasoning with first order nondeterministic specifications 375
Křetínský M → Černá I 233
Kučera A → Černá I 233

Leavens GT, Pigozzi D: A complete algebraic characterization of behavioral subtyping 617
Lengauer C → Gorlatch S 761
Lennerstad H → Lundberg L 425
Leth L → Degano P 335
Lundberg L, Lennerstad H: Optimal bounds on the gain of permitting dynamic allocation of communication channels in distributed computing 425

Mahmoud H, Flajolet P, Jacquet P, Régnier M: Analytic variations on bucket selection and sorting 735
Manna Z → Kesten Y 837
Mannila H → Khardon R 267
Mecca G → Bonner AJ 511
Middeldorp A, Ohsaki H: Type introduction for equational rewriting 1007
Mitrana V → Csuhaj-Varjú E 913

Ohsaki H → Middeldorp A 1007
Olderog E-R → Schenke M 1

Paul WJ → Abolhassan F 463
Pigozzi D → Leavens GT 617
Pnueli A → Kesten Y 837
Power J → Kinoshita Y 693
Priami C → Degano P 335
Proietti G: An optimal algorithm for decomposing a window into maximal quadtree blocks 257

Ravelo JN: Two graph algorithms derived 489
Régnier M → Mahmoud H 735
Roth D → Khardon R 267

Salomaa A → Ilie L 665
Schenke M, Olderog E-R: Transformational design of real-time systems. Part I: From requirements to program specifications 1
Schenke M: Transformational design of real-time systems. Part II: From program specifications to programs 67
Schewe K-D, Thalheim B: Towards a theory of consistency enforcement 97
Schmidt K: How to calculate symmetries of Petri nets 545
Schneider M → Dolev S 447
Shen H: Finding the k most vital edges with respect to minimum spanning tree 405
Sweeney PF → Tip F 927

Tang CY → Yen WCK 143
Thalheim B → Schewe K-D 97
Thomsen B → Degano P 335
Thorup A → Forst G 721
Tip F, Sweeney PF: Class hierarchy specialization 927

Varricchio S → Intrigila B 817
Vincent MW: Semantic foundations of 4NF in relational database design 173
von Wright J → Back RJR 295

Woeginger GJ → Fiat A 287

Yen WCK, Tang CY: An optimal algorithm for solving the searchlight guarding problem on weighted two-terminal series-parallel graphs 143
